

ANTONIN CHARRIER

Full stack developer

TECHNICAL SKILLS

Full stack web and mobile development: back end (C#.NET), front end (Angular / Vue.js), Android (Xamarin / Java)

LANGUAGES

Native French, fluent English (TOEIC 865 in 2014 and regular trips to Ireland), intermediate Spanish

ABOUT ME

I am a French full stack developer who enjoys working on modern web and mobile technologies. I'm experienced with front end web frameworks and with Android development.

PROFESSIONAL EXPERIENCE

Xamarin/Angular consultant | Capgemini (Paris, France) | since September 2017

I am currently working on a project of several application for security agents as an apprentice. I made an Android application with Xamarin and now I am creating an Angular web application.

Trainee .NET consultant | Capgemini (Paris, France) | February 2017 – August 2017

I worked on the same perimeter as my current experience as a trainee. I maintained applications made with ASP.NET, WPF and .NET web services in a small team of 4 people.

EDUCATION

Software engineering expert | 2019 | IN'TECH (Paris, France)

I studied software engineering for 5 years through technical and human projects. My last school project, called Galt, is a website for .NET developers made with ASP.NET 5 and Vue.js 2 in 3rd year.

Science baccalaureate | 2014 | Sainte Marie High School (Cholet, France)

I graduated from a scientific baccalaureate (computer and digital science option) with honors
